

# Make your own slime!

## What you need:

- ½ cup glue (elmers glue works well, but PVA is also fine!)
- ½ cup water (if you want to make fluffy slime, skip the water and instead add 3 cups of shaving foam)
- ½ tsp baking powder
- 1 tbsp saline solution
- Food colouring
- Glitter (optional)
- Spoon or clean lollipop stick to mix
- Bowl

## Instructions:

- Mix the water and glue together in a bowl. You can try using less water if you want thicker slime.
- If you want to colour your slime, add a few drops of food colouring and mix it in, but be careful, a little goes a long way!
- Add in the baking powder and mix well.
- If you want glitter, add it in now and mix.
- Add your saline solution and mix well. Once it is starting to combine, you can use your hands to knead it well!!
- Now you have made your own slime!

## Top tip!

It may be worth using gloves if you want stronger colours for your slime, as it can turn your hands a different colour, even if it does wash off eventually.
